

Field Tested. Ranger Trusted.

**When your equipment needs expertise.
When your timeline can't wait. When compliance matters.
Ranger Field Services is your on-site partner.**

Who We Are

Ranger Field Services keeps power distribution and motor control systems running. We're an officially recognized ABB Value Provider with field-tested technicians who understand what end-users and contractors actually need: fast, reliable expertise without the corporate overhead.

What We Do

From startup to ongoing support, we handle the technical work that keeps your jobs moving. Whether it's getting a new system live, preventing unexpected downtime, or modernizing aging equipment— we've got the skills and availability to make it happen.

Equipment We Service

- Switchgear & Switchboards
- Transformers
- Circuit Breakers
- Motor Control Centers
- Cables
- Relays
- Ground Fault Protection Systems
- Low & Medium Voltage - 120V to 35kV

Our Services

Commissioning & Startup

Get systems live faster. We handle testing, verification, and final handover so you can move to the next job.

Maintenance

Preventive plans that work. We build custom service agreements so your equipment stays reliable and your schedule stays clear.

Modernization & Upgrades

Extend equipment life. Replace legacy components, update firmware, or upgrade selectively without a full overhaul.

Unplanned Outages

When the unexpected happens on critical infrastructure and onsite expertise is needed, Ranger is ready to be onsite supporting your needs to get you back up and running.

Power System Reliability Assessments

Know your risks before they become problems. Site walkthroughs, maintenance trending, and compliance studies that prioritize what matters.

Why Ranger

Field-tested expertise you can trust. Local availability. No bureaucracy.
Just skilled techs who understand your timeline and deliver results.
